

# KoolTemp<sup>®</sup> PUR

## Polyurethane Insulated Shipping Containers

**KoolTemp PUR** prequalified reusable solutions are an ideal choice for maintaining your high-value payloads during demanding shipping conditions. Combined with Koolit<sup>®</sup> refrigerants, these solutions provide superior maintenance of internal payload temperatures for long time periods, even under extreme weather conditions. The Kooltemp PUR's high R value custom polyurethane is unmatched by other foams, including expanded polystyrene (EPS), extruded polystyrene (XPS), and other rigid polyurethanes. This non-ozone depleting formulation is EPA compliant, and contains no CFCs and HCFCs. The lightweight one-piece molded polyurethane KoolTemp PUR containers are held in an outer corrugate box sealed at the top with a soft foam polyurethane plug or rigid polyurethane friction fit lid. This modular design

allows for easy packout, reuse, replacement of corrugate for reuse, and recycling of individual parts. Stock sizes are ready for immediate shipment. The KoolTemp PUR is also available in custom sizes and printing.

\*Containers come with outer corrugate, except the U29-1.5 and U386-3, which are available molded only.

\*\*Containers have 4" soft foam inserts/plugs, except the U29-1.5, U103-1.5, U148-1.5, U32-2, and U39-2 have 3" plugs.

\*\*\*The U825-2 is designed with a tongue-in-groove urethane (vs. foam insert plug) lid

\*\*\*\*The U234-1 is designed with a molded (vs. foam insert plug) lid. The U386-3 is designed with a 3" thick urethane cut sheet (vs. foam insert plug) lid.

\*\*\*\*\*Minimum order quantities might apply. Call for details.
