

## What is CCT Route Pro™?

CCT Route Pro is part of our digital suite of solutions and services available on CCT Smart Solutions portal. It is a digital tool used to determine the best pack-out for our last mile seasonal solutions (CCT Rx™, Rx Naturals, Rx Mini and Rx Extended) using a predetermined shipping route, predictive weather route and predictive APIs.

USA AVERAGE ANNUAL TEMPERATURE MAP

46.4 - 53.6	68.0 - 82.4
53.6 - 60.8	82.4 - 89.6
60.8 - 68.0	89.6 - 96.8

## Why do you need CCT Route Pro?

- CCT Route Pro will provide you with guidance for selecting an appropriate pack-out for your shipment requirement.
- Given that climates vary dramatically throughout the US, using a calendar to determine when to switch seasonal pack-outs is not an accurate or recommended method for your shipments.
- CCT Route Pro takes the guesswork out of pack-out decisions to give you assurance that your shipments will arrive in compliance.
- By using CCT Route Pro, you will likely save money in shipping costs, gel packs, and product.
